

Dear [Approving Manager],

I am writing to request sponsorship to attend AFROTECH Conference, a multi-day tech event taking place Nov. 1-5, 2023, in Downtown Austin, Texas. This multi-day conference offers a chance for impactful real-life connections across the tech and business community—all while providing an expansive pathway into hundreds of corporations looking for partnership opportunities with diverse businesses, thought leaders, and thousands of potential job seekers.

This conference is a once-in-a-lifetime chance to engage with a variety of professional development courses in technology, business operations, Web3, product development, and philanthropic endeavors. After attending this event, I will return equipped with actionable skills, relationships, key takeaways, and methods that are beneficial to our team and can be implemented within our own organization. We ultimately will be able to boost team efficiency and morale as well as expand our knowledge of emerging trends and technology to increase our technical fluency in an ever-changing landscape.

AFROTECH™ Conference is bringing together technology and business executives at the top of their game to share their expertise through workshops, panels, and keynote presentations. Some of the industry leaders featured include: Arlan Hamilton, Mark Cuban, Bubba Wallace, and Tanya Sam. The event will also have daily programming focused on innovation in operations, corporate marketing, leadership, emerging tech trends, and more!

The Corporate registration price is \$750 and includes access to all the workshops, presentations, and corporate-only networking sessions.

This investment will allow me to support our team with new expertise, a larger network, and more innovative ideas. In addition, I can provide a report of my key takeaways and recommended actions for our team to ensure we get the full value of this conference. Please let me know if you have any questions. I look forward to your response, and thank you for your time and consideration.

Sincerely,
